

**4 Plate brake tester for cars and  
Light commercial vehicles  
up to 4,000kg.**

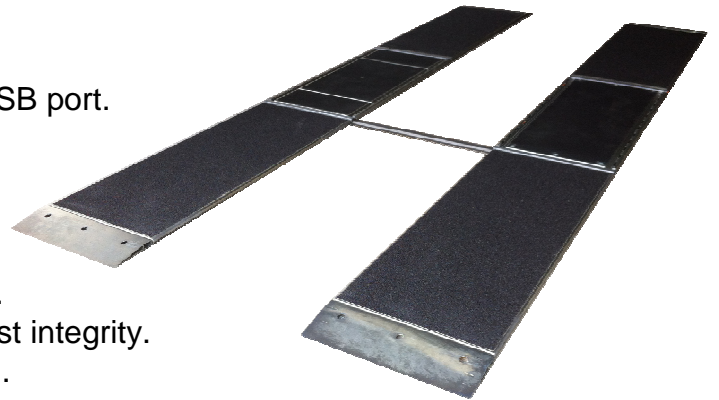

**QUALITY  
MADE IN GERMANY**

**The electronic four - plate brake tester with integrated slip tester,  
shock absorber / McPherson  
strut tester and weight cells.**

- Brake tester measures 4 wheel braking forces left and right as well as front to back simultaneously and realistically as on the road.
- Brake force measurements shown in newtons.
- Weight cells show load distribution.
- Slip plate tester allows a fast check of toe in or toe out.
- Shock absorber test quickly evaluates shock absorber condition.
- The PC software combined with a colour laser printer, gives optimal storage and presentation of test results and customer data.
- Modern design
- No trip hazard because of low height. (only 20mm high OH&S)
- Easy installation by you or us - plug and play.
- Fully zinc anodised.
- Uncomplicated and quick test procedure.
- Low voltage –powered from 5V computers USB port.
- Maintenance free roller bearings.
- Extremely low running costs.
- High grip tread coating - gentle on tyres.
- Licensed software is upgradeable.
- Data shown on PC screen and fully printable.
- Photo of vehicle included in test report, for test integrity.
- European TÜV and NMI Standards approved.
